

REPRESENTATION OF KOMALA ABROAD

The protest of Fabric Factory of Kurdistan entered its 3rd day

According to news that was received from the Fabric Factory, three days ago, the employer announced that six contract employees were going to be sacked from work. More than four hundred workers of this factory began a protest against the sacking of employees and stopped working.

As a result of this, the workers formed two committees, a protest organisation committee, and a workers protection committee was formed to protect the workers of the city of Sanandaj. The two committees are working hard together for this community of workers.

Komalah (Kurdistan organisation, communist party of Iran), requests all the workers from other companies and cities around Sanandaj to come together and protest against this un-humane act and protect all the workers from all over the province.

We call upon all organisations and human right groups all over the world to come together and protect workers rights, and support the protest of workers of the Fabric Factory.

At the moment, the owner and government are trying to put down the protestors and stop the two committees formed. Protecting the workers protest of the Fabric Factory of Sanandaj could once again secure their victory.
